Midterm Information

1 General Information

The midterm will take place on **Wednesday, November 4th** from **11:10am–12:50pm** in **EX 200**.

Please arrive on time. Do not enter the room until the teaching team has completed setup and you are instructed to enter.

You may bring **one single-sided, 8.5 x 11 inches, handwritten aid sheet**. The sheet must be handwritten and may only contain writing on one side. If these instructions are not followed, the aid sheet will not be permitted during the exam and the situation may be treated as an academic integrity concern.

Calculators are not permitted. All electronic devices, including cellphones and watches, must be turned off and stored in your bag for the duration of the exam.

Please bring a valid form of identification, such as your student card or government-issued ID.

2 Structure and Topics

The midterm will cover material from both the **lecture slides and assignments** for Weeks 1–6 (i.e. up to and including classification. You will **not** be tested on tree-based methods.) You are responsible for understanding the concepts discussed in lectures, as well as those explored through the assignment questions.

To help you prepare, I recommend the following resources:

- **Lecture slides:** Review the material covered in class.
- **Assignments:** Revisit the assignment questions and make sure you understand the underlying concepts and statistical reasoning. There will be **no coding questions** on the midterm, so you do not need to memorize code.
- **Past midterms:** Several past midterms have been posted on the course website to give you an idea of the types of questions you may encounter.
- **Textbook exercises:** If you would like additional practice, you can work through relevant questions from the textbook.
